Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Supplemental to the restriction requirement made in the Office action mailed December 4, 2003 and upon further review of the distinctness of the species as argued by applicant in the response received June 19, 2003, the following election from patentably distinct species is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I comprising figures 1, 1A, 1B;

Species II comprising figures 2, 2A, 2B;

Species III comprising figures 3, 3A;

Species IV comprising figure 4, 4A;

Species V comprising figures 5, 5A;

Species VI comprising figures 6, 6A;

Species VII comprising figures 7, 7A, 7B;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic to all species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 3677

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Newly submitted claims 48 and 49 are directed to an invention that is independent or distinct from the invention originally elected for the following reasons: The product as claimed can have its two portions fastened by another and materially different method such as providing the slidingly engageable fastener with structure according to claim 25 with an unapertured base, providing a second slidingly engageable fastener with structure according to claim 25 with an unapertured base, arranging the two fasteners so as to be slidingly engageable and sliding the two

Art Unit: 3677

fasteners so as to engage. This alternative method described above provides a base without fenestrations and is materially different from that of claim 48. Withdrawal of these claims is therefore proper.

Since applicant has received an action on the merits for Group I comprising article claims 1-34 and 44-47 per applicant's election, this invention has been elected for prosecution on the merits. Accordingly, claims 48 and 49 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Brittain whose telephone number is (703) 308-2222. The examiner can normally be reached on M-F 5:30-2:00.
